Hi guys,

We upgraded our machines. We really like the changes. It's funny how the smallest things can make your day. We like that all the features are visible, ie [redacted] etc., on the window used for entering the target information. We also like the change from [redacted] to the standard court order terminology of [redacted] (It would be nice if [redacted] could also be changed to the standard court order terminology of [redacted]) [redacted] We were a bit disappointed that we still cannot concatenate the [redacted] files. We really LOVE the concatenate feature. As you know, we have dropped the [redacted] and have been using the concatenate feature to upload our CDNRS files for about two weeks now. It is awesome! Please thank all at TICTU for their tremendous work.

[redacted]

I will forward the below info. to the Tel Apps people and see if they can get it corrected.

Thanks,

TTAs [redacted]

Since TA is an analytical tool we pass all the dialed digits from the DCS 3000. Have you contacted TA to see if they can modify their system to handle this types of called numbers?

[Redacted]

I just spoke with [Redacted] they are familiar with this. They said the customer is not actually dialing the [Redacted]. Apparently this occurs when the customer makes a call that is handed off to the old [Redacted] network. They claim during the handoff a [Redacted] added. Here is a sample of two calls that were rejected today and the associated log file:

[Redacted]

Do you have an example call or target number? [Redacted]
[Redacted] We need to look at the data to determine why it's happening.

Hi guys,

I have a quick question about [redacted] This may be something you have long been aware of but, since I just started doing the uploads, I have not seen it before. On some outgoing local calls with [redacted] the raw data indicates a [redacted] was dialed before the number. As a result this number [redacted]

[redacted] All are outgoing calls from [redacted] phones to local numbers here in LA. I can't believe would be dialing [redacted] before they make a local call. Do you know why this is happening?

Hi [redacted]

Attached is a document containing the instructions we provide to case agents for uploading their [redacted] data. The case agents are currently uploading the [redacted] files obtained from the DCS 3000 collection system (I previously sent several samples of the [redacted] files to you). The attached document also provides an explanation of the current issues/problems associated with uploading the [redacted] files. Hopefully this will help you guys to resolve these problems/issues. Thanks for your help. If you have any questions just call me, [redacted]
