[redacted]

As per our meeting on 1/10/05 to discuss the interface requirements to the Redwolf for our equipment.

I am currently writing some tasking and have a few questions:

1. Does the Redwolf support [redacted]
[redacted]
[redacted]

[Redacted]

2. Can we get the information on what [Redacted] Redwolf supports?

[Redacted]

3. Specifications on how to interface call information to the Redwolf [Redacted]

Welcome back. I don't see any need for [redacted] to work with Redwolf. [redacted] but we have no plans to interconnect these networks to Redwolf. They should hook up to [redacted]. I have seen the [redacted] demo a few times. [redacted] is in charge of that group now, vs [redacted] can give you a brief. Feel free to call either of them.

~~SENSITIVE BUT UNCLASSIFIED
NON-RECORD~~

Hi [redacted]

This is the afternoon for me to pelt you with e-mails. This is the last one for today.

As you know, we had [redacted] group from [redacted] out this past week and [redacted] folks are arriving Monday.

[redacted] have done a great job coming-up with several possible interface solutions, and [redacted] and [redacted] have been briefed this AM on them in preparation for next week's training.

Some "needs" that have surfaced so far:

(S)

1. We have some licensing issues and some other items that we need from [redacted] I intend to reach-out to [redacted] to start running some of these needs by him (he is the COTR). I also need to find-out who the Program Manager is, so I go through him, too.

(S)

2. [redacted] has had some preliminary discussions with [redacted] on interface issues - we should meet with them after next week's training to compare our needs (also, will there be a need to input any other [redacted] data into Red Wolf?).

(S)

3. [redacted] is a [redacted] Program Manager for Red Wolf who has been speaking with me during our visit there this past week. He is obviously interested in "selling" and is as sincere as he can be without telling me too much about Red Wolf's problems (he is a [redacted] so if he deceives me he is dead meat - we discussed this on the first day). He wants to show me their IP lab as it pertains to [redacted] I have avoided this so far (my mission is [redacted] but he may corner me next week while I am there, so I will listen and not provide input, so I don't cross any threads with [redacted]

b1
b2
b6
b7C
b7E

(S)

4. [redacted] have quite a bit of very valid points re RED Wolf design and operation that may be useful in the design of the next system. Being a [redacted] user, I have had my eyes opened some, too. I have directed them to keep notes re their suggestions, and I can submit them in some consolidated form to you for dissemination, if you deem appropriate. This has actually turned into a great opportunity to expose some of ITD's best Telecommunications Engineers to Red Wolf's innards and I think the constructive feedback would be useful to [redacted] group.

5. Can you suggest how we [redacted] get a presentation of [redacted] It will be important for us to see that piece of the puzzle, too.

Regards,

[redacted]

Hi [redacted]

(S) I don't believe I've met you before, but want to introduce myself to you as one of the SSA's assigned to [redacted] SPTU. One of his Programs [redacted] has been tasked to deliver the evidence [redacted] to Red Wolf (RW). I know [redacted] is aware of this as [redacted] have enlisted his invaluable help on several occasions already [redacted]

(S) The effort has gotten to the point where I thought it would be appropriate for me to reach-out to you for some other "needs" that we have, and also start cutting you and [redacted] into our efforts.

(S) As a result of [redacted] sessions at [redacted] over the past 2-weeks, [redacted] determined that the following modifications/enhancements are needed for our [redacted] RW systems (preferably prior to being sent-out from [redacted])

1. [redacted]
2. [redacted]
3. [redacted]
4. Upgrade RW Software to newest version.

(S) If it helps re the licensing issues, please stress to [redacted] that these systems will never be deployed operationally in this configuration. The purpose of these systems is **only** for testing/experimenting/developing methods to input various forms of collected data into Red Wolf in a format as currently specified by Red Wolf. We understand that if any of these changes need to be incorporated into the deployment package for Red Wolf, that another effort will be required with [redacted]. This phase of our effort to input our collected product into Red Wolf is exploratory and we are still gathering information.

As we develop potential solutions to provide our data to Red Wolf in a way that will enhance the usability of [redacted] we anticipate that there will be questions/interface needs with [redacted] Engineers. Is there a contracting vehicle available that already exist for us to take advantage of, or will this be an additional task with [redacted]

You've probably got some questions about the basis for our needs here, so feel free to give me a call and we can sniff-out the next best step in our RW Interface effort.

Thnx-

[Redacted]
It would be best to have a brief meeting with [Redacted] and myself so that we can have a better understanding [Redacted] what SPTU it doing with it in regards to Red Wolf. Also, I suggest a more detailed meeting with DCS-5000 team members after you get more results from [Redacted] (I know you are already communicating with [Redacted] In speaking today with [Redacted] they are already working on the suggested changes and look forward to assisting SPTU in any way possible. I will have one of our contracts personnel [Redacted] look into your queries re a contract vehicle for SPTU to take advantage or if a separate task order is the way to go. I tend to think the answer will side with the latter, but I will defer to others more knowledgeable. I look forward to meeting you....

(S) All,

I spoke with [redacted] briefly this afternoon addressing the requests listed below. We've requested [redacted] for a quote to perform the four tasks described below. In addition, we have a mechanism in place to provide some technical support. A more comprehensive technical support plan is being discussed. In the meantime, we should get a quick response in order to review the expense and technical hurdles, if any. Our goal is to expedite these requests and get your testing started as quickly as possible.

To proceed forward, we plan to integrate a bi-weekly technical discussion/status mtgs between [redacted] I will send a notification with details when this is established. Tentatively striving for next Tues afternoon. Please let me know if you have any further questions/concerns.

Regards,

[redacted]

[redacted]

It was under our impression from discussions with the [redacted] engineers that [redacted] is already supported [redacted] They thought it would be just a simple [redacted] to enable this feature for our lab use. Again, we stress lab use [redacted]

[redacted] would be the most cost effective and simple solution for interfacing various systems into the Redwolf. CALEA protocol seems to be left at the interpretation of the C.O. manufacturers and Redwolf developers and does not support (in our interpretation) [redacted] Another ERF Engineer [redacted] s'looking at [redacted] for a solution to interface [redacted] into the Redwolf and provide a solution for [redacted] engineers informed us that [redacted] was the best solution for [redacted]

This request for the four items is to allow us to begin to evaluate [redacted] From this, we can determine what [redacted] will/won't support and return our recommendations for better support and integration. We have to get the systems first to be able to perform this evaluation. These four items, in our view based upon our exposure at [redacted] during training, would provide a quick way to get started on evaluation for future use. We already have other changes that we would like to have designed into the Redwolf but knew it would require major engineering changes/development by [redacted] These items would be discussed at a later time with [redacted] and other engineers [redacted] We do agree that there may and will be problems with [redacted] but we will find them through our testing. Again it was our understanding that [redacted] Engineers at [redacted] believed that [redacted]

(S) [redacted] is not left out. Right now, we need to see what [redacted] will/won't do so that we can come to the table with engineering changes. During this same time [redacted] can define [redacted] But this would be major engineering design changes/effort on [redacted] part.

SSA [redacted] will be contacting [redacted] for further management discussions. The above statements are in concurrence with all [redacted] engineers.

Thanks

All,

I don't intend to make any further preparations until management has a discussion and determine what our involvement is, if any. Also, how does [redacted] responsibilities [redacted] fit into this project, if any? Are her development/testing efforts combined with your efforts? This too needs to be addressed by management.

(S)

With that aside, [redacted] is working the initial four requests. They have several concerns: [redacted] unsure what [redacted] will do to the system performance/reliability, [redacted] is presenting major heartburn. You may have to assume some RISK in order to proceed with your testing. In order to help expedite things, can we [redacted] This may determine if the system can perform reliably enough to upgrade the others and proceed with more robust testing. This will be the first of many benchmark tests. Let me know your thoughts.

Hi [Redacted]

It was good to meet you at [Redacted] meeting.

Do you have any knowledge as to where our [Redacted] RW's is? I recall you were intending to check its status. We are getting some concern from one of the intended recipients of one of the systems [Redacted]

[Redacted] RW [Redacted]

Is there anything I can do on my end to get [Redacted] to make the modifications [Redacted] RW's and get them shipped to us?

Thank for any help you can provide.

Regards,

[Redacted]

Hi [Redacted]

I got another call from [Redacted] (RW Program Manager) today re a conversation he recently had with [Redacted]. Just to ensure we don't have any miscomm.'s, [Redacted] can you reach-out to [Redacted] and check if she needs to get together with you guys again soon? [Redacted] told her about the conference call you guys had last week; it's up to her to call over to us if she has questions about how we are doing, but for this one instance, please call her and "check-in".

Thnx-

[Redacted]

I did know that your group was working on interfacing with the RW - I suppose we may have to discuss how exactly the systems will do that. Right now, we are trying to wrap up C&A of the system as it is currently configured - before we start making any major changes. The SSP is presently undergo some modifications and I can discuss providing you a copy after we have completed those changes, and had it signed off on...

As to any third party software, we can discuss that with [Redacted] in January - He is the system security engineer.

Give me a call towards the end of next week and we can set up a time to get together.

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

Hi [Redacted]

As you may or may not know, the group I work in is currently undertaking efforts to have our collection systems interface with the Red Wolf System. In short, we would like to hook our collection systems to [Redacted] Redwolf [Redacted]

[Redacted] I know that any potential solutions we develop to do this will have to be approved by the Red Wolf Configuration Control Board. As such, I would like to get from you a copy of the Red Wolf System Security Plan so that we can have a valid reference point to start working towards a solution. Also, because we may need to use some third party software in our solution, I was wondering if there exists a list of approved sources for and versions of certain types of software such as [Redacted]

[Redacted]

Thanks [Redacted] and Happy Holidays to you!

Hi [redacted]
Hope all is well with you. I've got a quick question for you. Have you had good experiences with [redacted] [redacted] I was talking to [redacted] [redacted] at the [redacted] conference. He's got a current [redacted] [redacted] He'd like to [redacted] [redacted] So, basically my question is this.. If he were to [redacted] [redacted] could we expect to see any results? I'm not sure if [redacted]

b2
b4
b6
b7C
b7E

Anyways, we would be very interested to hear if you have had experience doing this in the past. Take it easy

(S)

You mentioned in our phone conversation that your section had an exemption from installing [redacted] on the
[redacted] data collection system. Has that info been passed to the field [redacted] I was told by [redacted] at
ERF that all laptops to include [redacted] and Red Wolf data collection systems had to have [redacted]

Thanks for your continues support.

[redacted]

Attached are the sessions that [redacted] system is having trouble demodulating. I need your input for the case agent.

Something came up last week just after I spoke with you so I waited to send this today. Then our email capability was down. Such is life. Anyway I hope your vacation was rewarding and I will talk to you soon.

Take Care,

To: [redacted] (ITD) (FBI)
Subject: RE: RedWolf recording info for [redacted]

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

The outside folks would be the Network Engineering Unit and the Enterprise Engineering Unit both of ITOD. I would like to see a visual representation like the link analysis view. My though would be each [redacted]

[redacted]
sent/received.

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

That's good, I guess the question is... now that we some data (and are getting more) what do we do with it? Who do we provide it too (both in the [redacted] and outside - like maybe someone at IRD (now ITOD) or the CIO's office?)

-----Original Message-----

Subject: RedWolf recording info for [redacted]

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

I just had a meeting with EOSO concerning [redacted] for the RedWolf. [redacted] and [redacted] are working on procedures to obtain this information. Next week they plan on [redacted] and [redacted] for at least 3 sites (large, medium, small). They are also identifying how many sites fall into the large, medium, and small range (total sites is [redacted])

b2
b6
b7C
b7E

This information will be collected over a week and will include:

[redacted]

I am coordinating with them and hope to have info in a little over a week. [redacted] and I will assist in this effort as required.

Cheers,

[redacted]

[redacted] There
are two situations:

- 1. [redacted]
- 2. [redacted]

b2
b7E

[redacted]

There is a similar problem for adding [redacted]. Do you want that capability as well?

Both portable redwolfs are down now. I cannot test this until [redacted] fixes them.

Can you submit a change request to the [redacted]?

For discussion at our meeting, this is the best list I have of work to be done to tackle [redacted] for the end of July deadline and beyond:

Work to be done on [redacted] programming:

- [redacted]
- [redacted]
- [redacted]
- [redacted]
- [redacted]
- [redacted]
- [redacted]
- [redacted]

Work to be done on [redacted] cleanup:

- [redacted]
- [redacted]

b2
b6
b7C
b7E

Work to be done on [redacted] Machines:

- [redacted]
- [redacted]

Cleanup and work to be done on [redacted]

- [redacted]
- [redacted]
- [redacted]
- [redacted]

Changes to [redacted] loader:

- [redacted]

Process to be established:

- [redacted]
- [redacted]
- [redacted]

[redacted]

[redacted]
This archive sounds great! I sometimes work on a [redacted] for more than one day if I start it at the end of the day or if it is lengthy, so am wondering what happens to [redacted] Will the final version of my [redacted] replace the one which might have gone into the system the day before and how will the agent or analyst know that he/she doesn't have the final version? I generally change the date on the [redacted] to have it reflect the day the [redacted] is finished. Can we really do away with printing [redacted]

[redacted]
Thanks

Bill--

I'm glad to hear that the users have discovered [redacted]. According to my notebook, [redacted] has been receiving [redacted] since July 21. Would publicizing this feature have helped us to keep [redacted] at ERF?

You can see the redwolf [redacted]
[redacted]

The code appears on the redwolves at:
[redacted]

We will send the [redacted] multiple times. The redwolf [redacted] again. (The [redacted] "find" command uses the "-newer" option.)

Each [redacted] shows up as a [redacted] so you will see the earlier and later versions.
