UNCLASSIFIED
NON-RECORD

b2
b6
b7C
b7E

[Redacted]

The answer to your question is yes.

But, if you want another form produced, a request must go through [Redacted] for an additional form in Red Wolf. The reason is that this system (Red Wolf) is Bureau wide and standards must be met for reporting requirements which precludes each division from creating reports for themselves.

The [Redacted] POC for Red Wolf is [Redacted] I do not know who the POC is in [Redacted]
Or you can contact FBIHQ @ ELSUR and see if they can create the form in Red Wolf that you want.

[Redacted] (FBI)
Subject: RE: Question Regarding [Redacted]

UNCLASSIFIED
NON-RECORD

[Redacted] and all others,
I do not want to make a change. I was merely asking [Redacted] if the Red Wolf system had the capacity to produce an additional form containing the information below:

[Redacted]

We currently have a support person manually typing captioned information on a

form. I thought perhaps a push of one button may save hours of manual typing.

All: You are cordially invited to attend a meeting not yet determined.

Where: ERF
When: May 3 - 7?
Time: ?
Subject: [REDACTED]

Last Wednesday, I spoke with [REDACTED] from [REDACTED] and discussed the need to develop a sound, reliable solution to [REDACTED] RedWolf and the DCS-3000. [REDACTED] will not be available next week, but the following week appears to be open. What day and time is best for each of you during the week of May 3-7? Please send me your requests and make sure that you include more than one choice. I will coordinate what works best for the majority. Thanks so much.

PS [REDACTED] informed me that [REDACTED] have made the decision to begin developing [REDACTED] [REDACTED] for now. I don't have any details about how this algorithm is actually calculated. We can definitely get more specifics at our meeting. Is this the direction we wish to go, or are there other ideas? This is what we need to discuss. Please ponder on this. Thanks.

Later,
-c

b6
b7C

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

While the fact that we have Digital Collection Systems is not a surprise to anyone, we try to not talk about it too much. The programs behind them are sensitive, though maybe not classified Sensitive.

We have answered many questions of Congress, OIG, and other outside entities and we always try to state "Digital Collection System". The safest (and accepted) way of referring to them is using that phrase, not their individual names.

I am pretty sure the actual names "Red Wolf" or "Elsur Digital Monitoring System" are NOT classified, because here within the Bureau we talk about them all the time and usually mark emails "sensitive but Unclass." The methods and collection targets are the classified items.

I am CCing [Redacted] in case I am saying anything incorrect.

b6
b7C

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

Good afternoon [Redacted]

b6
b7C

I cannot believe that the mere fact of the FBI's having Digital Collection Systems is that sensitive. As far as I know after Language Services were audited by our dear friends from OIG, the final report (even unclassified version) contained numerous references to these systems without specifically mentioning them. In addition, there were numerous media reports mentioning these systems, obviously without going into details. In fact, I was interviewed (cleared by AD) for a local NBC station two years ago where these systems were mentioned.

However, to be on a safe side, I would seek a clarification from the ERF CSO.

Best regards,

[Redacted]

Good Morning,

You were contacted last year by one of my co-workers, [redacted] regarding the sensitive nature of [redacted] the Red Wolf FISA Digital Collection Systems. [redacted] advised our unit that the fact that we even have these systems is very sensitive so we will need to redact these system names from any documents. My question to you now is, are only the names of those systems sensitive (and any information obtained from them) or does that include even the mention that we have FISA Digital Collection Systems? I appreciate any assistance that you can give me regarding this matter.

SECRET
RECORD [redacted]

Gentlemen,

Resulting from follow-up to the teleconference we had with [redacted] a couple of months ago, we (through the Unit Chief of TOCU [redacted]) received a request for comparative information between the RedWolf collection system and the [redacted] system. A person representing [redacted] (Tech Agent), would like to make arrangements to meet with a group of knowledge folks next week to discuss the issues below plus any relevant comparative information that we know he should be considering but did not specifically request. As the [redacted] system will be used exclusively for the collection of [redacted] data, we (TOCU/ADTU) will have input to this response. However, most of the details they are looking for will need to come from within TICTU.

b2
b6
b7C
b7E

These are the significant issues [redacted] mentioned;

b6
b7C

1. From a [redacted] perspective, how do these systems compare (TOCU/ADTU)?
2. What are the capabilities or issues associated with each system [redacted] (TICTU)
3. What are the issues related to [redacted] within each system and [redacted] (TICTU)
4. What is the relative ease of maintenance associated with each systems. Not just the physical and software maintenance, but

b2
b7E

also the administrative maintenance that keeps the system running smoothly once the system is initially established?

This would include ease of use and skill level required relative to the system administration duties? (TICTU)
5. What would the relative cost be for systems with comparable input capacity? (TICTU)

It was not specifically a question posed in the information request, however, I recall from the teleconference that physical space limitation may also be an issue. Therefore, you may want to consider providing comparative information along this dimension as well. I get the impression from him that he would be grateful for any additional information relative to important differences between the systems that we may be able to provide..

I believe the during the teleconference they identified a [redacted]
They did not specifically request [redacted] but we will definitely advise
them that they should have some level of [redacted] to address more challenging collection
scenarios that they may encounter. My understanding of the arrangement is that [redacted]
[redacted]

b2
b7E

[redacted] is flying into the states today and will be at the Academy tomorrow. His current plan is to touch base with me at that point, with the objective of finalizing plans for a meeting with all the experts here at ERF, preferably some time during the following week (June 12 -16). I will be at the ERF on Monday and Friday of next week. I need to know if either Monday or Friday will give you guys adequate time to gather all the information you deem to be relevant. I would also like to know your availability for meeting with [redacted] next week.

b6
b7C

Look forward to your response,

[redacted]

MEETING NOTES

June 19, 2006

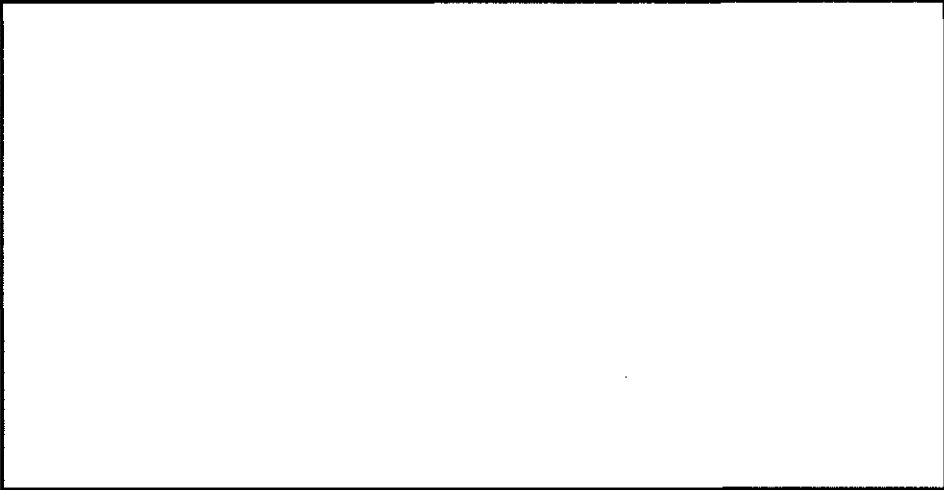

Background:

The Telecommunication Intercept and Collection Technology Unit (TICTU) and the Technical Operations Coordination Unit (TOCU) were requested to participate in discussions held relative to the

List of Key Considerations:

- System cost
- System reliability
- Microphone interface and audio quality (intelligibility) of data
- Ease of use and ease of administration
- Remote administration capabilities
- Network connection and remote access capabilities
- Data portability (common data format and/or availability of conversion utilities)
- System footprint
