[redacted]

I'm sure you guys have had it with my many emails regarding the 5000 C&A, but I'm not finished yet. :) Seriously, we've got a deadline of 30 April to turn in [redacted] and I need to make sure we're prepared. At any rate, what I'm looking for are backup procedures, and this will go into our Contingency Plan. I looked through the Red Wolf XG Admin Training guide, but didn't see anything related to backups. Do we have anything in soft (preferred) or hardcopy? In absence of that, I could sit down with one of you and go through a backup, and document the steps.

Thanks,

[redacted]

Although ERF/DCSP [redacted] can be delegated responsibility for ensuring stickers are applied, this task should really be done by the site. Systems don't become classified until the site starts to input information - sometimes months after the installation. Having other than site personnel responsible for marking systems/drives would be feasible only in cases when the system went classified during the install. It's an easy task to apply stickers to the outside of the "boxes", but each hard drive needs to be marked as well.

FYI - During the [redacted] installation, I noticed that the hard drives that were pulled from the system - for shipping - didn't have any markings. [redacted]

Gang,

While visiting [redacted] last week, I noticed that there weren't any "SECRET" stickers applied to any of the RedWolf equipt. That would include the [redacted] and the DCS-5000 [redacted]. Also, there is a need to install [redacted]

b2  
b7E

Issue: In order to comply with Security Policies, we need to adhere "Secret" and "Unclassified" stickers as needed. Either ERF reps at RedWolf installs, or [redacted] should ensure that the Stickers are applied per Security Guidelines. What do y'all think? Thnx.

That's All Folks,

I just completed an analysis of the fielded systems and those yet to be installed this year. I understand that the goal is to have [Redacted] systems at [Redacted]. Based upon my analysis, there are [Redacted] locations that have [Redacted] systems and do not have [Redacted] Red Wolf systems. The list is below:

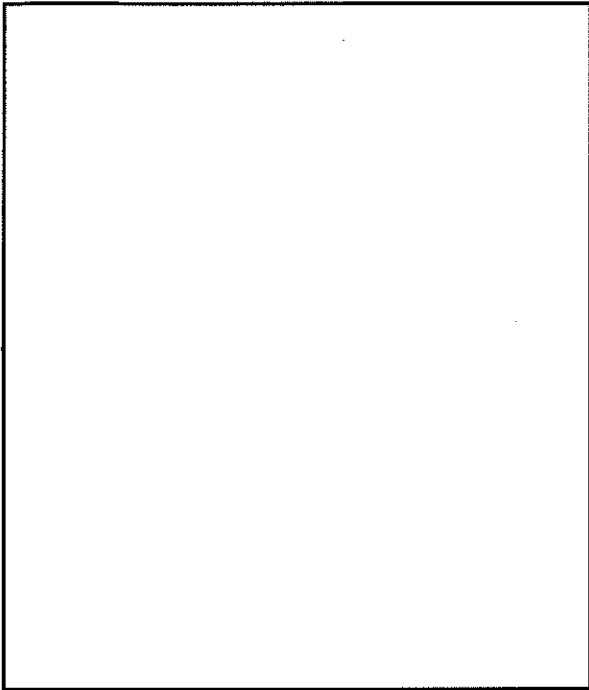

[Large redacted area]

An approximate cost to replace the [Redacted] Field Office systems with [Redacted] would be [Redacted] or [Redacted] for the equipment only. If any of these systems were sized differently, the cost would increase.

Also, by recovering [Redacted] systems from sites that have had or are going to have [Redacted] Systems installed this year, we could gain [Redacted] and [Redacted]. These sites include:

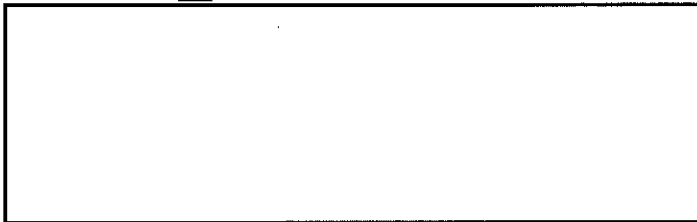

[Large redacted area]

Final item is that there appear to be [redacted] Systems that could be terminated immediately. The sites include:

b2  
b7E

And another [redacted] that could be terminated by the end of this calendar year

Testing of this software patch is currently underway, and deployment is tentatively scheduled for the week of 16 August 2004. Installation of this patch will require

I will provide further instructions prior to implementation,

but I will be out of the office until 9 Aug. I am off to Germany and I will try to have a beer for each of you.

Auf Wiedersehen!!

Also - I am trying to compile a good email list of the government POCs for the DCS 5000/ Redwolf system, so if you know of any changes to this list that would improve its accuracy, please let me know

Thanx

**SENSITIVE BUT UNCLASSIFIED**  
**NON-RECORD**

Due to operational requirements which have necessitated the rerouting of power from the ERF RedWolf system, C&A testing has been put on hold. [Redacted] devices which was scheduled for this week will be rescheduled as soon as operational power requirements have been restored. Our best estimate at this time is that this will cause an approximate two week delay. I will keep you posted.

In the meantime, we will continue work on the peripheral equipment to be included in appendices to the DCS-5000 SSP, [Redacted] and I will visit ORC this week to begin work on [Redacted]

[Redacted] We would probably be wise to pencil your testing in for late October at this point. Let me know what you think.

Stay Tuned!

While putting together some information for the OIG response, the subject of how some of the RedWolf specs came up - particularly in regards to the sizing of on-line storage capacity. Apparently from discussions [redacted] this was based on a projected mix of the

different types of sessions expected to be collected - ie [redacted] is cited in the RFP. I know that you both [redacted] have been going through a lot of the old RFP documentation. Have you come across anything on this subject, or can we locate it? This info may need to be relooked / revised - particularly prior to any new RFPs being issued.

b7C

UNCLASSIFIED  
NON-RECORD

I heard back from [redacted] already regarding tomorrow's training - and after explaining the training, she now has no problem if [redacted] shows up.

b6  
b7C

The other issue [redacted] had, dealt with the System Admin class we scheduled exclusively for [redacted] for December 7, 8 & 9. She had already scheduled another class for their TS's and would not be able to have the TS's in our SA class. I've left a message for [redacted] asking if he could do the training at [redacted] on December 1, 2 & 3 [redacted] preference) or her second choice is to move the class back on day to December 6, 7 & 8.

b2  
b6  
b7C  
b7E

Depending on [redacted] response, I'll be coming to you [redacted] for your direction to modify B-410 W to change the dates of training.

Task Order B-385 W was issued to [redacted] 9/21/04 to ship your office [redacted] Red Wolf workstations. These workstations were to be received before October 5, 2004.

Please confirm your receipt.

I was informed today that the connectivity in [Redacted] is such that only [Redacted] can use the Red Wolf. Has this been reported to you? Is there any fix, such as another [Redacted]

(Yes, we just had emails about this subject this morning.)

Speaking for the [redacted] utilizes and rides across the [redacted] We do not have funding attached to the [redacted] The initial funding and planning by [redacted] did not include [redacted] Thus their limitation of only [redacted] capability (keeping in mind that the [redacted] operations would suffer if more RW workstations were added.) An email went out on 1/6/2005 re making [redacted] and bandwidth issues. See attached. That particular RA was increased to a full [redacted] but that has to support the RA personnel as well as [redacted] for RW operations.

b2  
b6  
b7C  
b7E

As you reported in a recent email (attached [redacted] also does not have any [redacted] as to where and when they might need a connection at RA sites. Which gives [redacted] nothing to work with re planning bandwidth issues for the RAs.

[redacted] could get a separate [redacted] between the two sites, but who is going to pay for it. [redacted]

Thoughts... Ideas.....

[redacted]

As per our meeting on 1/10/05 to discuss the interface requirements to the Redwolf for our equipment.

I am currently writing some tasking and have a few questions:

- 1. Does the Redwolf support the use of [redacted] ?

a.

[Redacted]

as well?

[Redacted]

2. Can we get the information on what [Redacted] the Redwolf supports?

b2  
b6  
b7C  
b7E

[Redacted]

3. Specifications on how to interface call information to the Redwolf via [Redacted]

[Redacted]

Thanks
