[redacted] ref: orientation presentation pending

Will you be able to present for the upcoming orientation. If not, can you advise of a recommended replacement.

Your involvement in the past has been an important factor to the overall success of the orientation and I hope that your schedule will allow you to participate again. The technology manager portion of the program is scheduled for Wednesday, 17 November from 1:45-2:45 and 3:00 to 4:00 (a short break scheduled between sessions). Please let me know if you (or a designated alternate) would be available.

Gang,

While visiting [redacted] last week, I noticed that there weren't any "SECRET" stickers applied to any of the RedWolf equipt. That would include the [redacted] DCS-5000 [redacted]

Also, there is a need to install a large UPS for the DCS-3000 [redacted]

Mission Critical Needs Statement

The Telecommunications Intercept and Collection Technology Unit (TICTU) is responsible for the development, deployment, and support of access and collection technologies to perform lawfully authorized electronic surveillance of telecommunications services. The TICTU is engaged in a number of rapidly developing and changing telecommunications activities and projects that require program planning, requirements development, development, deployment, support of collection systems, and industry liaison and coordination support. In order to accomplish its mission, the TICTU requires the continued support and augmentation of its current capabilities.

The requested equipment is required to [redacted] [redacted] for national security investigations. This equipment will be used to egress Communications Assistance for Law Enforcement Act (CALEA) [redacted]. The equipment will be integrated with the FBI's enterprise collections system (DSC-3000) to support collections.

Please process the attached requisition on an "urgent and compelling need" basis so that the necessary critical engineering services may continue without interruption.

The TICTU conducted a market survey to determine what services were available that would satisfy the needs [redacted]. After several months of research, TICTU determined that such services are available from [redacted] which are named on the GSA FTS-2001 contract. Although [redacted] is also listed on the GSA FTS-2001 contract, they have been excluded from this list due to their offering not meeting the security specifications required in the Statement of Work. [redacted] both offer suitable infrastructures [redacted].

The estimated cost of this network is \$560,000 annually, to be paid out of TICTU's budget. Funding is available from Budget Item [redacted] Subobject Classification 552580.

Title: DCS-5000

Synopsis: The Engineering Contracts Unit (ECU) is requested to establish a new contract [redacted] for one (1) base year with four (4) option years, to be funded yearly. The contract will provide labor and services to continue support of the specification, development, verification, operation, and maintenance of electronic surveillance systems for emerging wireless and wireline telecommunications technologies.

Enclosure(s): FD-369, [redacted] in the amount of \$2,100,000 and Sole Source Justification.

Details: The Telecommunications Intercept and Collection Technology Unit (TICTU) is responsible for the development, deployment, and support of access and collection technologies to perform lawfully authorized electronic surveillance of telecommunication services. The TICTU is engaged in a number of

rapidly developing and changing telecommunications activities and projects that require program planning, requirements development, deployment, support of collection systems, development, and industry liaison and coordination support. In order to accomplish its mission, the TICTU requires the augmentation of its current capabilities with additional collection systems software development, wireless communications technical expertise, and telecommunications industry expertise.

The DCS-3000 is a custom system developed, deployed, and supported by the TICTU. The DCS-3000 provides access and collection of [REDACTED]

[REDACTED] The DCS-3000 has recently been modified to comply with new Counterintelligence Division (CD) security requirements to meet certification and accreditation. These modifications are integral to maintaining security [REDACTED] New technologies that must be addressed include [REDACTED]

[REDACTED] is currently supporting many of TICTU's activities and is the only company with the unique mix of qualifications required to adequately address the breadth and depth of the TICTU program needs. [REDACTED] supported the development of the current DCS-3000 collection system. Most recently [REDACTED] has modified the DCS-3000 software suite to accommodate [REDACTED] CALEA data into [REDACTED] collection systems.

The TICTU requests the Finance Division to establish a new contract with [REDACTED] for one (1) year, with four (4) option years, to be funded yearly. The contract will provide support to extend the current DCS-3000 system and to specify and develop additional capabilities for the system.

Funding in the amount of \$2,100,000 is available for the contract specified. Funding is available as follows:
