1. The enclosed application is approved for operational use at the above  
locations subject to the guidance provided in the following paragraphs.

2. For the intended use in the Aeronautical Mobile and Aeronautical  
Fixed service, the subject equipment is not in accordance with the US and  
ITU Table of Frequency Allocations over its tuning range. Operations  
will be on an unprotected, non-interference basis to the established  
services at the above locations.

3. The provisions of NTIA manual Sections 5.2 and 5.3.3 are considered  
applicable to the operation of the subject equipment. Based on the  
information provided, the subject equipment does comply with NTIA Manual  
Sections 5.2 requirement for frequency tolerances and unwanted emissions  
and, Section 5.3.3 requirement for spurious, and harmonics emission  
levels, unwanted emissions bandwidth and receiver's IF selectivity and  
spurious rejection. In any instance of harmful interference caused by  
nonconformance with these provisions, the responsibility for eliminating  
the harmful interference normally shall rest with the agency operating in  
nonconformance.

4. The subject equipment does not comply with the requirements of

MIL-STD-461E for harmonic levels. Compliance is not mandatory but the standard may be used as a design objective.

5. Frequency assignments request must be submitted using Standard Frequency Action Format (SFAF) and coordinated with the cognizant area frequency coordinator in accordance with ACP 190 US SUPP-1 (C), Guide to Frequency Planning, prior to activation.

6. Coordination with the NTIA Spectrum Planning Subcommittee was requested.

7. Operational use within the appropriate theater commands outside the United States has not been approved. Approval for operational use in the intended deployment area requires appropriate CINC's statement(s) that the subject system has been deemed frequency supportable.
