

Test Facility Map:

The Horse Barn Hill Farm (see fig below) located on the University of Connecticut main campus in Storrs, CT is the site for our UAV operation. The farm is roughly 1000 ft by 1000 ft. A take-off and landings site is located on a hilltop offering unobstructed views of the UAV over agricultural fields in the flying area shown in the figure.

The GPS coordinates of the center of our flight paths above agricultural fields are (41.819064,-72.251115). The UAV will never be more than 2,500 ft from take-off site. The farm is isolated from the main campus and there are no main roads or highways near the farm. Fig 2 shows the sectional chart with the test site marked.
