

## **Special Circumstances: Summary of Communication Frequencies**

Communications will be maintained with Roanoke ATC, as required by the FAA, using cell phones. Adequate cell phone coverage at the test site has been confirmed. Personnel communications will be carried out using standard two-way radios. Table 1 provides a summary of all transmitting frequencies to be used during flight operations.

**Table 1: Transmitter Frequencies to be used during Flight Operations.**

<b>Transmitter</b>	<b>Frequency</b>
ATC Communications	Cell Phone
Manual Remote Control Link	2.4 GHz
XP3.1 Autopilot Link	900 MHz
Sensor Payload Link	5 GHz
Personnel Communications	460 MHz
